# STAY SALTY

---

A

We are a French family-business which develops Kiteboarding gear for demanding riders. We believe that the product is the heart of a company, and as a result most of our efforts are spent on the research, development and testing of the collection.

Our passion is about Kiteboarding as much as it is about creating and innovating, we enjoy both the hours spent at the office and the ones spent on the water.

*“ We have been into Kiteboarding since the beginning. “*

All over these years, we have seen how Kiteboarding evolved and how many people were hit by this passion. Today it's pure happiness to see all those guys & girls on the water with a big smile on their faces.

MANERA is meant to enable those people to make the most of their time in the ocean. We create products so nobody has to get out of the water because they are cold or uncomfortable.

**BECAUSE WE BELIEVE EVERY MOMENT OUT THERE SHOULD BE A GREAT ONE.**

# MAGMA

## METEOR

### MATERIALS

#### 1 REFLEX SKIN

- Best stretch of the market
- Durable: Tear resistant, UV resistant

#### 2 AIRFOAM

- Made to be light, improving comfort & endurance
- Best flex & insulation on the market
- Quilted touch

#### 3 MAGMA FLEECE

- Plush loops work as insulators & heat generators
- Smooth, soft & comfy feeling against the skin
- Dries fast

### 3D DESIGNED

Our suits are directly designed on a model adopting a Kiteboarding specific position, for a much more natural feeling while riding.

# KEY FEATURES

WARMTH & COMFORT

## SD2 TAPE 2.0

- Triple glued / Blind stitched / Inside tape welded by an air heater machine
- Durable & Flex
- 100% waterproof

## SEALING PRINT

- Keep the water away
- Keep legs & arms panels in place

## BACK KNEE EMBOSS

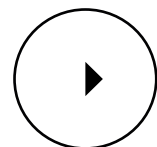

- Helps the neoprene to bend more naturally
- Greater comfort during flexion

## WATER STRAINER

- Drains the water out of the leg
- Continue the session in the best possible conditions

UNION HARNESS

# ECLIPSE

## HARNESSES

### ADAPTIVE SHELL

- The Adaptive Shell stiffness shades from hard in the center area to softer on the edges
- The stiff center-belt prevents the harness from folding and compressing your body while preserving a good lumbar support
- The softer outline preserves intuitive mobility and adaptability
- It results in a shell that is forgiving where you need flex and stiff where you want support

### R&D HARN-ESS

Having worked on ergonomic designs for a while, our goal was to push our frame concept to more stiffness, allowing a better support of the back & a lower fit.

But something 100% hard was not an option: Our back needs some adaptability & human morphology is unique.

So here comes the ECLIPSE, a skilful balance between stiffness & flex that brings support where you need it and the freedom to move the way you want.

STIFFNESS	90%
LIGHTNESS	95%
DURABILITY	95%

# KEY FEATURES

## SUPPORT & ADAPTIBILITY

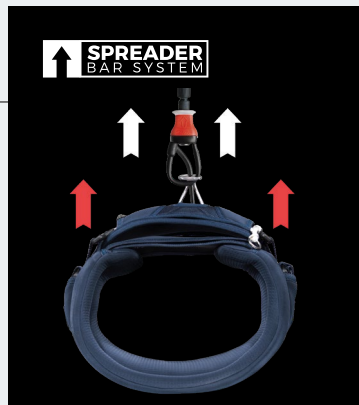

### GEL FOAM

- The gel foam disperses pressure evenly & efficiently to provide a "pillow comfort", much appreciated during long sessions
- It creates a different sense of feeling while riding as it moves along with your movements, therefore the contact with the harness is more intuitive & it prevents any rash or rubbing discomfort

### SPREADER BAR

- Length of our bars are well suited so they will pull along both sides of the harness
- Avoids any lateral contraction on the body

### DOWN HOLD SYSTEM

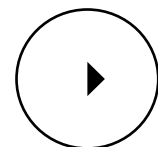

- The spreader bar has an asymmetrical attachment that distributes the forces downward.
- Secured in its original position, the hook does not ride back up

### TUCKFLAP

- Flaps are inserted into the harness, they are compressed and locked when straps are tighten
- Stiffen the connection between spreader bar & harness & prevent it from riding up

## HARNESSES

HIGH PRESSURE | LOW PRESSURE

### ENERGY DISPERSION FRAME

- Developed in close collaboration with a kinetic science lab to optimize load distribution.
- Avoids any unwanted muscular efforts to offset the bad traction
- Raised durability because the loads are not spread through soft parts

### SINGLE FOAM

- Thermoformed one-piece foam backing
- Much lighter than multiple foam layups used in some harnesses
- More durable as there are less parts to be glued or stitched together

### BALLISTIC NYLON

- Developed for the Royal Air Force during WWII
- Made of thick nylon threads
- Outstanding abrasion resistance, extreme durability

**STIFFNESS** 60%  
**LIGHTNESS** 90%  
**DURABILITY** 95%

# KEY FEATURES

ENERGY DISPERSION  
& COMFORT

## MANERA LEASH RELEASE

- Trigger the leashes easily with left or right hand
- Leash can be slideable or clamped between the two rings

## SPREADER BAR

- Length of our bars are well suited so they will pull along both sides of the harness
- Avoids any lateral contraction on the body

## DOWN HOLD SYSTEM

- The spreader bar has an asymmetrical attachment that distributes the forces downward
- Secured in its original position, the hook does not ride back up

## TUCKFLAP

## BLIZZARD

### KITEBOARDING JACKET

#### DETAILS

<b>REF.</b>	<b>22205-0300</b>
<b>SIZING.</b>	S-M-L-XL
<b>COLORS.</b>	SAILOR BLUE

#### FEATURES

- 3 layers vest
- Light, waterproof & windproof
- Spreaderbar passes through the 2 side pockets
- Breathability to go SUPing, biking, or wear it in the street

HARNES INSERT  
VIEW

The Blizzard jacket creates a cocoon around the Kiter that allows a far better resistance to cold even with a standard wetsuit.

Whether you are on the water or debriefing the session on the beach, the Blizzard will keep you warm & comfy.

## FEATURES

### WIND STOPPER

The 3 laminated layers are working like a hedge to cut the wind and protect the body from cold gusts.

### WATER REPELLENT

The pores in our internal membrane are not big enough to let water drops pass through.

### BREATHABLE

Thanks to its micro-perforated internal membrane, the jacket evacuates moisture and prevents the body from being wet.

## BOOM VEST

IMPACT VEST

### DETAILS
