

ECLIPSE

HARNESSES

ADAPTIVE SHELL

- The Adaptive Shell stiffness shades from hard in the center area to softer on the edges
- The stiff center-belt prevents the harness from folding and compressing your body while preserving a good lumbar support
- The softer outline preserves intuitive mobility and adaptability
- It results in a shell that is forgiving where you need flex and stiff where you want support

R&D HARN-ESS

Having worked on ergonomic designs for a while, our goal was to push our frame concept to more stiffness, allowing a better support of the back & a lower fit.

But something 100% hard was not an option: Our back needs some adaptability & human morphology is unique.

So here comes the ECLIPSE, a skilful balance between stiffness & flex that brings support where you need it and the freedom to move the way you want.

STIFFNESS	90%
LIGHTNESS	95%
DURABILITY	95%
