

# KEY FEATURES

## SUPPORT & ADAPTIBILITY

### GEL FOAM

- The gel foam disperses pressure evenly & efficiently to provide a "pillow comfort", much appreciated during long sessions
- It creates a different sense of feeling while riding as it moves along with your movements, therefore the contact with the harness is more intuitive & it prevents any rash or rubbing discomfort

### SPREADER BAR

- Length of our bars are well suited so they will pull along both sides of the harness
- Avoids any lateral contraction on the body

### DOWN HOLD SYSTEM

- The spreader bar has an asymmetrical attachment that distributes the forces downward.
- Secured in its original position, the hook does not ride back up

### TUCKFLAP

- Flaps are inserted into the harness, they are compressed and locked when straps are tighten
- Stiffen the connection between spreader bar & harness & prevent it from riding up
