HARNES INSERT  
VIEW

The Blizzard jacket creates a cocoon around the Kiter that allows a far better resistance to cold even with a standard wetsuit.

Whether you are on the water or debriefing the session on the beach, the Blizzard will keep you warm & comfy.

## FEATURES

### WIND STOPPER

The 3 laminated layers are working like a hedge to cut the wind and protect the body from cold gusts.

### WATER REPELLENT

The pores in our internal membrane are not big enough to let water drops pass through.

### BREATHABLE

Thanks to its micro-perforated internal membrane, the jacket evacuates moisture and prevents the body from being wet.
